

# BS 1088 MARINE PLYWOOD

BS 1088 Marine Plywood as manufactured by Samling Global Ltd is an excellent choice where a flat and stable panel is required. Utilising high quality hardwood veneers, this plywood is produced from very thin veneers that contain negligible splits or knots resulting in a quality panel.

Applications vary from traditional boat building applications to projects that require a durable panel such as templates and moulds.

## Marine Plywood - BS 1088

Glue Bond	Type 'A' Bond Phenol Formaldehyde
